PH-60V

6 Plate Pharmaceutical Paper Folding Machine

6-plate, single-pass paper/leaflet folding machine

This machine is perfect for producing ultra small folds down to 18mm on paper weights ranging from 45 - 150gsm and sizes from 80x100mmm to 290x500mm (including most common sizes A6, A5, A4 and A3)

The Galaxy PH65v Medical, Pharmaceutical Paper Folding Machine enables you to perform multiple small folds for package inserts from as little as 18mm on 45 - 150gsm paper. This Medical /pharmacy folder is suitable for Companies that require small instructions/manuals/pamphlets to be folded prior to insertion into small product boxes. Other suitable businesses include those in the cosmetic, healthcare, production and parts markets/industries.

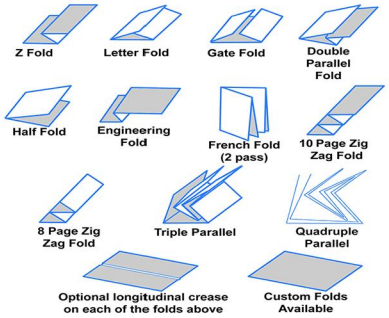
With multiple fold types that can also be customised for particular jobs requiring short miniature fold lengths, the PH65v is flat-friction fed using a 2 feed wheel system with thickness separator, for paper weights of 45 -150 gsm and paper sizes of min: 80mm x 100mm and max: 290mm x 500mm. The PH65v folder can produce greater than 16 styles of set folds and custom folds from it's 6 fold plates and its smallest fold is 18mm with a high speed output of up to 12,000 leaflets per hour.

Vertical Stacker

The PH65v has the vertical stacker that collects leaflets neatly at the end of the folding process.
The stacker has a positive impact on productivity, reducing the time and effort required in collating the folded leaflets before placing them in product boxes.

Creasing Tool

The creasing tool can be added as a final process will crease the folded document, still in the single pass to produce a final fold, so it can be handled and inserted quickly and easily into your product carton.



Specifications	
Speed	Up to 12,000 / hour
Feed Tray Capacity hopper	150
Piece Counter	Yes
Multiple sheet feeding	No
Automatic Feed	Yes
Number of Fold Plates	Up to 6
Smallest Fold	12mm
Feed on the Go	Yes
Feed Type	Friction
Speed Controller	Yes
Tailor made furniture	Optional
Document height	100-500 mm
Document width	80-290 mm
Document weight	45 -150 gsm

System Specification	
Length x Height x Depth	1115 x 495 x 550 mm
Weight	51 Kg
