DF-915 Specifications

Input Paper Size
Minimum — 128 mm wide x 182 mm long
Maximum — 297 mm wide x 432 mm long

Input Paper Weight
Nominally 50 to 160 gsm (up to 130gsm for A3)

Paper Quality
Fine quality, recycled, drawing, art, coated

Folding Mode
Single, double, half concertina, concertina, letter, brochure, cross fold (paper thickness: 50 to 105gsm), other custom folds

Loading Capacity
400 sheets (80 gsm)

Processing Speeds
60 - 230 sheets / min (5 steps)

Paper Feed Method
3 wheels, automatic paper separation, skew correction device

Paper Size Detection
Automatic detection of fixed paper sizes (A3, B4, A4, B5, A5, B6)

Error Detection
Non-feed, mis-feed, paper jam

Total/Batch Counter
4-digit addition system

Fold Position Correction
0-5mm from fold (0.125mm increments)

Moving Stacker Roller/Stopper Automatic setting

Additional Functions
Memory for folding correction, 2 custom fold memories non-standard paper size mode, automatic fold settings

Options
Hand-feed unit (A4 paper only)

Power Supply
Voltage — Single phase 220-240V AC
Current — 0.7 A 50Hz

Machine Dimensions (mm)
Depth — 524 mm
Width — 1,086 mm
Height — 497 mm
Weight — 43 Kg

Duplo

Automatic Folder DF-915
the perfect folding solution

fast: 230 sheets/min folding speed
easy: automatic folding set-up
versatile: 6 standard fold modes
letters: optional letter folding unit

Duplo DF-915

Automatic Folder DF-915

Automated folding made simple

Designed for both speed and simplicity, the DF-915 is consistent and accurate even when running at 230 sheets per minute.
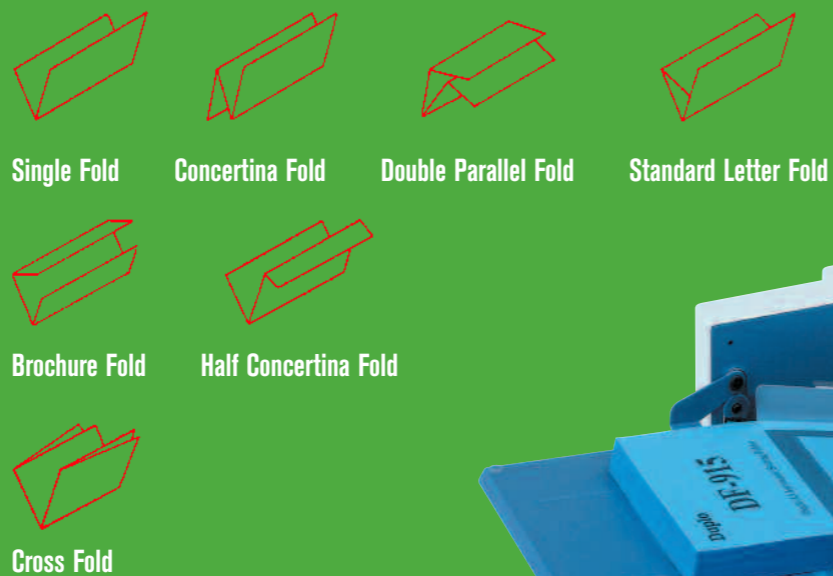

Automatic Set-Up

The DF-915 automatically senses standard paper sizes (A3 to B6) and sets the fold-positions for each of the 6 built-in folding styles.

For non-standard paper sizes, the length can be input manually and the fold positions will be adjusted accordingly.

NEW Optional Letter-Feed Unit

This optional unit can dramatically speed up the production of letters in any organisation. It is able to fold up to three sheets at a time – either loose or corner stapled delivering them ready for insertion into envelopes.

Six Fold Styles

The six standard folding styles are pre-set into the machine with cross-folding possible by re-running the job. In addition, there are two memories for custom fold styles, enabling quick set-up of the most common jobs in the future.

Single Fold   Concertina Fold   Double Parallel Fold   Standard Letter Fold
