

# Folder Inserter

**1. High-Capacity Vertical Stacker**

Preserves printing order and holds up to 500 finished envelopes so operators spend less time unloading

**2. Touch Screen Display**  
7" color graphical interface with wizard-based programming makes operation simple and intuitive

**3. Feeder Linking**

Continuous operation is achieved by linking feeders. If one feeder runs empty, another one automatically takes over, allowing you to refill as needed until your job is complete

**4. Envelope Hopper**  
150-envelope capacity with on-the-fly reloading

**5. Automatic Collator**  
Collate and fold up to 8 pages together

**Easy to use and stress free mail machine**

The FI-64i folder inserter can accommodate a wide range of documents, inserts and business reply envelopes (BRE) making it the ideal choice for a variety of applications and office environments. The FI-64i combines unparalleled ease-of-use with advanced technology. The intuitive color touch screen control panel prompts the operator through each step of job setup and operation.

**Efficient Processing**

Load the feeders, and the DS-64i will accurately assemble the documents, fold, insert and even seal the finished envelopes, all in one quick process. The high-capacity envelope stacker is designed to improve accessibility and unloading of envelopes on the fly.

**Processing Flexibility**

FI-64i's FlexFeed function allows you to process all document formats (inserts, documents and business reply envelopes, etc.). Additionally, the "Daily Mail" function even allows hand feeding of multi-page stapled document sets.

**Easy Operation**

The color touch screen display and automatic job setup make the FI-64i exceptionally easy to use. Simply load envelopes and documents and the FI-64i will adjust all settings automatically and even save them to the memory for instant recall. And, with automatic adjusting feeders, it can't get any easier.
