# Make the most of incoming mail

Incoming mail is very important in any business, however it can also be complex and time-consuming. Invoices, payments and correspondence arrive daily and can easily stack up.

Efficient handling of incoming mail is a simple way to improve profits and customer satisfaction:

- Save staff time through automation
- Speed up document distribution, processing and filing
- Respond quickly to customer sales orders, invoice queries, complaints
- Cut document storage costs

## Smarter processing

Integrate letter openers and electronic document management software to handle incoming mail in a seamless process. Envelopes are opened quickly and contents scanned to digital files to allow capture of key information, rapid distribution, on-line processing and reliable archiving and retrieval.

## Fast-start document processing with a letter opener:

- Quickly slices the envelope edge to allow easy extraction
- Handles mixed mail without need for pre-sorting
- Opens envelopes without damage to contents

### Milling cutter technology

The LM-22 and LM-27 both utilise modern milling technology which precisely slices one edge of the envelope without damage to contents.

### No need for pre-sort

Letter openers handle the most commonly used envelope formats and sizes so there is no need to pre-sort your envelopes.

## Which one is right for you?

**LM-22**

- Up to 32,000 letter openings per hour\*
- Separate catch tray
- Smaller and lighter

**LM-27**

- Up to 36,000 letter openings per hour\*
- Reverse conveyor for easy stacking of larger mail volumes
- 1,000 items can be stacked beneath the input feed

### Very quick and easy to use

The fast, convenient and secure solution to open your incoming mail

LM-22 and 27 are heavy duty letter openers that can open over 10 envelopes per second, so they are ideal for users who deal with high mail volumes. The multi-function touch screen means both machines are very easy to use.

- Maximum envelope thickness 6mm
- Multi-Function touch screen
- Controls multiple feed and counting modes
- Mixed Thickness Separator
- Manages the flow of mixed mail for optimal cutting performance
- Accurate counters

**LM-22****LM-27**

## Electronic Document Management

Digitising incoming mail makes it quick and easy to distribute, process, store and retrieve documents.

Save time, save space and increase customer satisfaction.
