# THE CUTTING EDGE OF LETTER OPENERS

## Boost productivity while saving time

If your staff still opens mail by hand it may be costing you more than you think. Galaxy LM-17 letter opener does far more than just open letters - it opens the door to more convenient and efficient processing of incoming mail. The LM-17 helps your business work more effectively and efficiently. Process letters of various sizes and thicknesses quickly and cleanly. Its unique milling cutter technology carefully slits letters open to eliminate the risk of damaging contents or having to dispose of cutting waste. The LM-17 is handy, versatile, and compact. It is ideal for businesses that manage medium to large volumes of mail that need to:

- Open large format envelopes directly from the stack
- Manage thick mailings up to 10 mm
- Open letters on multiple sides

## Top five reasons to get the IM-17 letter opener

**Save time** every single day by reducing the tedious task of opening incoming mail by hand.

**Open up to 400 letters per minute** quickly and cleanly.

**Eliminate the risk** of damaged letter contents that have been cut to pieces.

**Fully automatic** and easy to use - No sorting or pre-setting required.

**Handles all types of mail** up to 10 mm thick.

Contact Galaxy today for a personal, live, and interactive demo and see for yourself.

## FLEXIBLE AND VERSATILE

### Handle thicker mail items

The LM-17 can open letters up to 10 mm thick – with no pre-sorting required. Thanks to the machine's automatic adjustment to the letter thickness, opened letters are neatly stacked before you know it.

### Oversized mail?

Large format letters can be conveniently inserted and opened. The large feed table enables you to process large formats, even from stacks.

### Open letters on multiple sides

Open two sides in two steps. Or take that a step further to open C6 and C5 formats on three sides with the letter guide.

## EASY TO USE

### Neatly slit envelopes open

Reduce the risk of damaging letter contents and eliminate issues with paper-clipped correspondence. Further benefits include no bothersome disposal of cutting waste and no risk of paper scraps in the opener.

### Great operational convenience

Simply place the stack of letters onto the feed table, push it over the release mechanism and away it goes. No sorting, no pre-setting, no buttons to press. The letters are automatically fed into the slitting device.

### Fully automatic

The letter opener switches on and off automatically when letters are inserted. If a letter that is too thick is inserted it is automatically rejected, making jammed letters a thing of the past.

Save hours processing mail with the LM-17. Reallocate staff to more important and revenue driving tasks.

#### SPECIFICATIONS

Opening technique	Slitting
Speed (up to)	400 Letters / Min.
