

Automatic Mail Openers

A swift, convenient and secure solution to process incoming mail.

Why purchase your letter openers from Postroom-online Ltd?

Lowest Prices: Being the UK's and Ireland's largest retailer of paper folding machine we have everything you need under one roof.

Range: A wide range of letter openers from two of the world leaders, Martin Yale and Galaxy.

Service/Technical Support: Our fully trained technicians along side our flexible approach means we can get both lower cost back to base and premium onsite service to your machine faster and at a lower cost than anyone else.

We supply 3 types of letter openers.

Blade: Letter openers are entry level, slicing the top of the envelope completely off.

Chadless: Letter openers only cut one side of the envelope, meaning there is no separate waste to jam the machine nor make a mess. As the envelope remains intact these letter openers can operate at higher speed than blade letter openers.

Milling: Letter openers are the premium type of letter opener. Milled paper waste is collected by a separate waste bin and opened envelopes have soft edges reducing the risk of paper cuts. Ideal for very high volumes.

The M1 Envelope Opener

The M1 Envelope Opener

This is perfect for a small office, print rooms and home use. Ideal for opening large quantities of envelopes and incoming mail. The cutting operation opens on the long side by slitting on only one side, this eliminates waste trims. With fast speeds up to 400 envelopes per minute with a width of slit 1.5mm upwards and the thickness of envelope up to 6mm. The envelopes are horizontally fed, so contents cannot be damaged and horizontal feeding stops contents to drop down and therefore be cut.
